

## *"Mom, are we there yet?"....*

That's a difficult question to answer: YES!... Kind of. Well we were for a bit. We finally made our move to our long-term base of Nabire! After almost 12 years of preparation, we made it to a place we hope to be long term. We are so excited to serve alongside the other MAF family and national staff in Nabire that we could do a little dance. After a frantic week of unpacking from our move from Sentani, we packed up our suitcases again and made our LONG journey back to the States for training and our first mini furlough. Currently we are exchanging our warm sea breeze for an arctic breeze as we spend some time with our families before heading back home to Nabire early this January.

I FOUND SANTA! Actually he is a regional church leader that I was able to fly back to Sentani. He helped open the airstrip we flew out of decades ago!

A side project of mine, while not flying/maintaining, was developing this VFR flight chart.

Team Ludvicek would like to thank you for all the prayers and support you have shown us through all our transitions. May God bless you during this season of celebrating Christ's birth—Emmanuel—God with us. Merry Christmas!

With love,

*Alex, Trish, Jackson & Benaya*
